Karen,
When I took over TIM from Melinda, she said you wanted to review the RODs. So I'm forwarding this to you.

include gw and sg monitoring as part of the final remedy
=====

Hi,

I forgot to cc you on my email to Danielle asking for the complete copy of the latest version of the ROD. Language on the need for engineering controls should include all new buildings, not just residential buildings, based on HERO's comments on the HHRA Addendum.

Thanks -- Medi

Hi Danielle,

Please also send the complete ROD from the last version.

Thanks -- Medi

Subject: Site 21 Record Of Decision: Language Changes to include gw and sg monitoring as part of the final remedy

Good Afternoon Medi and Myriam,

Attached is a summary of language that we are planning on changing in the Site 21 ROD so that soil gas and groundwater monitoring is included in the remedy as discussed during the meeting on November 15. The blue text shows what text will be added.

The intention is to conduct monitoring until the five year review, at which point the effectiveness of the remedy will be evaluated and it will be determined if monitoring should continue. The monitoring design, including the contingencies that were discussed during the meeting will be included in the Sampling and Analysis Plan for Site 21 monitoring as part of the remedial design.

Can you please review and return any questions or comments to me by Tuesday, December 11? If you would like to discuss this further please contact me.

V/r,
Danielle Janda
